**FAITHFUL SERVANT - GENERAL DESCRIPTION**

The Faithful Servant is the former semi-submersible barge Lucky Angel. The dock was originally built in 1979 and classed by the Chinese Classification Society (CCS). The dock underwent extensive mid-life upgrade and refurbishment in 2002/2003 under the same CCS class standards and was maintained under class until 2007. While its original non-lift transfer operations allowed a maximum lift/transfer weight of 20,000 L.Tons, dedicated service as a drydock necessitates a greatly reduced lift capacity typically 6,500 to 8,500 depending on weight and center of gravity properties of the vessel being docked.
